

AgriSOLUTIONS™

InterLock®

DEPOSITION AID, CANOPY PENETRATING & DRIFT CONTROL AGENT

PATENT PENDING

PRINCIPAL FUNCTIONING AGENTS:

Modified vegetable oil, polyoxyethylene sorbitan fatty acid ester, vegetable oil..... 100%

All ingredients are exempt for the requirements of a tolerance in 40 CFR 180.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

Eye Exposure: Hold eyelids open and flush with a steady, gentle stream of water for at least 15 minutes. Seek medical attention if irritation develops or persists or if visual changes occur.

Skin Exposure: In case of contact, immediately wash with plenty of soap and water for at least 5 minutes. Seek medical attention if irritation develops or persists. Remove contaminated clothing and shoes. Clean contaminated clothing and shoes before re-use.

Inhalation: Inhalation is not an expected route of exposure.

Ingestion: No harmful effects expected. If appreciable quantities are swallowed, call a physician or poison control center. Do not leave victim unattended.

Medical Conditions Possibly Aggravated by Exposure:

NOTES TO PHYSICIAN: All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Treat symptomatically. No specific antidote available.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

STORAGE: Store in original container only and keep sealed. Store in closed storage areas.

ADJUVANT DISPOSAL: Wastes resulting from the use of this product may be disposed of through on-site spray application or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. Contact your state and local ACRC recycler or visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

GENERAL INFORMATION

INTERLOCK® is a spray adjuvant designed to maximize pesticide performance by improving deposition of the spray application on to the intended target. INTERLOCK® improves coverage and reduces drift and evaporation of pesticides being applied by ground or air.

INTERLOCK[®] is unique and does not negatively affect spray pattern like other drift control adjuvants even when using air assisted type nozzles. INTERLOCK[®] should be used in conjunction with proper spray equipment selection set-up and use including boom height, nozzle type, size and pressure. Along with good judgment and the proper selection and use of spray equipment, INTERLOCK[®] can help professional applicators ensure the maximum performance of pesticides.

DIRECTIONS FOR USE

For use with Herbicides including desiccants

Prior to use, read all directions on this label.

The proper rate of INTERLOCK[®] is **NOT** dependent upon the type of pesticide formulation being applied. First, determine the pesticide formulation being applied such as liquid, flowable, or powder. Then select the proper rate according to the following table:

Drift Reduction

RATE OF INTERLOCK [®]	Pesticide formulation*
4 – 6 oz./A	E.C. or A. S. – liquid formulations
4 – 6 oz./A	D.F. or W. P. – dry formulations
4 – 6 oz./A	L.F. – liquid flowables

*E.C. = Emulsifiable Concentrates such as Trust[®], A.S.= Aqueous Solution such as Roundup[®], D.F.= Dry Flowables such as Accent[®], W.P.= Wettable Powders, L.F.= Liquid Flowables such as Sterling Plus[®]. Before mixing pesticides with INTERLOCK[®], conduct a jar test to determine compatibility.

DO NOT ADD THIS PRODUCT AT A RATE THAT EXCEEDS 1% OF THE FINISHED SPRAY VOLUME.

For use as a deposition aid with pyrethroid insecticides or other insecticides and fungicides: 2 - 4 oz/A

Aquatic Use: INTERLOCK[®] can be used for aquatic applications including surface water. Always follow tank mix product labels for specific directions and precautions. General use rate of 4 – 6 oz/A.

MIXING

Add INTERLOCK[®] after pesticides or other adjuvants are added but prior to complete filling of the spray tank.

For Direct Injection: INTERLOCK[®] can be applied through injection systems where INTERLOCK[®] is added to one of the system's chemical injection tanks. An in-line mixing chamber is recommended.

- Step 1 Add INTERLOCK[®] to the chemical injection tank.
- Step 2 Pump the correct amount of INTERLOCK[®] into the line.
- Step 3 Pump the proper amount of water, pesticide, and other adjuvants into the line for mixing with INTERLOCK[®] and chemicals before going into the spray boom.

Do not mix INTERLOCK[®] with SUPERB[®] HC, ALLIANCE[®], or CLASS ACT[®] NG in an induction system or container when all the products are undiluted. Once mixed in water, all the products are compatible in any mixing order.

Notice of Warranty

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS. This warranty does not extend to the storage, handling or use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
