GENERAL INFORMATION

EFFICAX® is specially formulated to enhance and improve deposition and soil residual activity for most herbicides and nutritional products, when used in a soil application. It may also be used with fungicides, biological nutrients or amendments and nutritional products as a foliar application to improve deposition and absorption and reduce drift. EFFICAX generates a more uniform droplet size spectrum, which results in enhanced deposition and coverage of the spray on the target surface.

NOT FOR AQUATIC USE.

DIRECTIONS FOR USE

EFFICAX is designed for use in agriculture, forestry, golf course, industrial, non-cropland, roadside, turf and ornamentals.

USE RATES

GENERAL: Use 5-16 fluid ounces of EFFICAX per acre. Rates of 5-8 fluid ounces per acre are considered to be adequate for most uses; however, some pesticides may require higher rates for best results. EFFICAX can replace the need for additional adjuvants in the spray mixture, when used at a rate of 16 fluid ounces per acre. Applications above 8 fluid ounces must be made prior to crop emergence to avoid any potential phytotoxicity.

DRIFT REDUCTION: Use 4 fluid ounces per acre.

Always follow the adjuvant use recommendations as shown on the pesticide label.

For pesticides that permit use of an adjuvant at a higher rate, follow instructions on that pesticide label. However, do not add this product at a rate which exceeds 5% of the finished spray volume, except when used as a diluent in dormant, basal, site preparation or other similar applications, per label instructions. Use caution at the higher use rates. When applying to a sensitive crop, first treat a small area to determine if there are any adverse effects to the crop.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.
PRODUCT STORAGE: Store in original container only and keep tightly sealed. Store in closed storage area.
PRODUCT DISPOSAL: Dispose of contents in accordance with all government regulations. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of federal law. Wastes resulting from the use of this product may be disposed of onsite or at an approved waste disposal facility.
CONTAINER HANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities. Recycling cleaned containers is the best option of container disposal. The ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
